## BOAT WOOD MOSAIC 2020 COLLECTION

## Product Profile:

### What is ancient ship wood panel?

Ancient ship wood panel is a kind of wood that made from more than a hundred years old trees, primary Mesua ferrea, stone vertebral, Queensland's wood, such as Catalpa wood.

Ancient ship wood panel is made from the retired or damaged old ship, strictly speaking it is a kind of antique solid wood wall tile or mosaic because the size of the panel is brisk shaped. Ancient ship wood mosaic is a retro-styled decorative material that is extremely beloved by many senior designers or architectures; imagine you walk into a coffee bar or tea room with historic wooden wall tile decoration, for sure that it will bring you back to old-world age of voyage exploration.

Alias: Old ship wood tiles, solid wood wall tile, ancient boat wood mosaic, ancient ship wood mosaic.

### Properties of ancient ship wood panel

Ancient ship wood tiles use ancient boat solid wood as its main raw material, which has higher transmittance and impact resistance than PVC plate, architectural resin panel is a translucent and eco environmental building material that has viscosity, clarity, resistance to chemicals, and fire resistant.

### Features and advantages

- a) Nature, eco-friendly and fashionable
- b) retro-styled
- c) Durable
- d) Water proof, can be applied in web environment.
- e) Ecological, 100% recycled
- f) Easy to clean and maintain
- g) Resistance to chemicals

## • Construction process

First

### Pave the preparation which is stick to the wall

Use and fit up a wood shelf, then wood shelf pave the plank above, and clean the dust guarantee the cleanness of the surface of plank, can construct and pave sticking to

Second

### Preparation of products

The products are put at the level in advance before constructing, confirmed constructing and paving the result after sticking to. As to the regular products, please adjust the harmony and esthetic of the whole in advance, for example, the small wood of one can be put by the big wood of one, by the thin wood, etc..

Third

### Material way of scribbling of sticking

Will assemble the glue to wipe on the plank evenly, in order to prevent assembling the glue to already solidify before the products have not been stuck well, daub area should control, keep the same with area of the products, then product the back spread and assemble the glue meanwhile, in order to reach better sticking result.

Fourth

### Pave and stick

It is generally that are paved and stuck to to pave the way of sticking according to the order with the direction, want debulk from leaving. According to the need, can sew one to strengthen the firm result in the wood with the nail

Five

### Adjust the size

in order to pave putting up the good result, can cut and adjust the products. For keep products appearance getting esthetic, we suggest that use simple and easy to push away, lift, saw, cut to product.

Note: due to the production of the natural material, each piece of product color and surface texture are not the same.
